

Software Developer with cloud experience / focus on Backend (m/f/d), Berlin

Are you looking for career opportunities within a global growing real estate company?
Then you might be our next Software Developer!

Join us and be a part of our journey.

At Common Logic we use Azure Functions to create nano-services that integrate all core applications in Akelius.

We strive for code quality, creating testable, robust code and having short development cycle.

Once you join our team, you will work in several domains of Real Estate Management and provide modern, cutting edge solutions.

You will have opportunities to grow in the company, learn and share your knowledge with all teams.

work description

- use Azure functions-based services to create API's
- improve, automate and come up with innovative ideas for existing processes
- collaborate closely with other teams to understand their requirements
- stay up-to-date with all that's new on the cloud development world

who you are

- profound experience in Typescript and Node JS for Backend
- knowledge of NoSQL databases is required (Mongo, CosmosDB, AzureSearch, ElasticSearch)
- good knowledge of T-SQL and SQL Server
- understanding of CI/CD in cloud environments (Azure preferred)
- fluent English, Speaking German or Swedish is a plus

what we offer you

At Akelius you get work-life balance, an inspiring workplace, flexible working hours and big responsibility within a flat organization.

In a helpful and open environment, we develop together as specialists and managers.

That is why we shape our staff with first class education at Akelius Business School.

how to apply

Please send your application to career@akelius.de including you latest CV.

You find further information on www.akelius.de.

about Akelius

Akelius acquires, upgrades and manages residential properties.

The company owns 47,000 apartments in Sweden, Denmark, Germany, France, England, Canada and the US.

Akelius concept is Better Living.

This means that Akelius upgrades residential units to a quality level with newly constructed apartments.

We build our own applications and create our own technology. Akelius also helps people in need around the world by Akelius Foundation's charity work.
